Component: Breadcrumb

1 Overview

Breadcrumb component will be used to create breadcrumb just below the header component. It can be included in all the components except for Homepage and can be disabled at page level.

2 Business Use Case

Breadcrumb component is used to show the page hierarchy and provides an easy way to navigate to the parent pages in hierarchy.

3 Design

The Navigation title of the page is picked in the breadcrumb and the breadcrumb dialog contains enable/disable toggle/switch and selection of Root level.

Default value for root level is 4.

4 Authoring Steps

Step 1: Open a page in editor mode.

ASSA ABLOY Electric Brand					
Products \lor Solution \lor Training \lor Transpo	Search	٩			
+ 🛱 🛱					
	Drag components here				

🕥 nagarro

Step 2: Open the content panel from the top left side panel and then click on the component tab.

1		₩ □	RESOURCES	Edit Y Preview	Fo
