Component: Header

1 Overview

A website header is the top section of a web page. It is the first thing that visitors see when they visit a website. It is also where main common information about a website usually stays, such as site navigation, etc.

Header component includes combinations of other child sections mentioned below:

- Logo
- Brand Division
- Navigation menu
- Search
- Icons

2 Business Use Case

Designing of Global Header Component for ASSA America Site Pages.

3 Authoring Steps

Step 1: Create a new page or open an existing page by selecting the page and click on Edit option.

- Step 2: Once the Page is opened, insert the Header component into the page. It can be achieved via either of following ways:
 - Go to the content panel from the top left side panel and then click on the component tab and Drag the Header component from the left side panel and drop it inside the Layout Container.

 Double click on the placeholder which is denoted by "Drag Components here", or click on the plus icon available on the placeholder and choose Header from the provided list of components

	Insert New Component	_	
	Q Enter Keyword		
	Header		
	Hello World Component		
	Hero Image Component		
	Image		
+	List		
	Logo Component	ents here	
	Mega Menu Component		
	PDF Viewer		
	Progress Bar		
	Separator
