Component: Rich Text Editor (RTE)

1 Overview

The Rich Text Editor (RTE) provides authors with a wide range of functionality for editing their text content. Icons, selection boxes, toolbar, and menus are provided for a WYSIWYG (What You See Is What You Get) text-editing experience.

2 Business Use Case

It is a way to easily display some Text and make it italics/bold/ underline, add hyperlink, etc. The way the author wants to display the text, the text can be displayed based on the plugin available in dialog of RTE.

3 Design

This RTE component contains the authoring for text.

4 Authoring Steps

Step 1: Create a new page or open an existing page by selecting the page and click on Edit option.

- Step 6: Click "Done" once you have entered all these details.
- Step 7: The Rich Text Editor will now be visible on the Page and can be previewed

5 User Interface

This is Text. SOme Random Text

The Core Components Text Component leverages the AEM Rich Text Editor (RTE). The RTE provides content authors with a wide range of functionality for editing their text content. The RTE is very flexible in its configuration and offers a number of options. Further details about how the RTE can be configured can be found in the articles <u>Configure the Rich Text Editor</u> and <u>Configu</u>
