Component: Separator

1 Overview

The Separator Component allows the content author to easily create a horizontal/vertical rule as a break between content to better organize information on a page.

2 Business Use Case

Separator Component displays a horizontal/vertical rule for separating content.

To add separator with horizontal rule on content pages. Tile component will contain the following information:

- Line type
- Thickness
- Color
- Type
- Margin

3 Design

The Separator component contain line type and other options to choose from while creating separator. Once all the options are selected and saved, it will generate and apply a separator on the page with the selected margin, thickness, color and line type.

4 Authoring Steps

Step 1: Open a page in editor mode.

	ASSA ABLOY Electric Brand												
		Products \lor	Solution v Training	∨ Transport ∨		Search	Q						
	_												
+		ü											
					Drag components here								

🕥 nagarro
