Component: Table

1 Overview

The Table component is used to add rows and columns and add data to corresponding cells.

2 Business Use Case

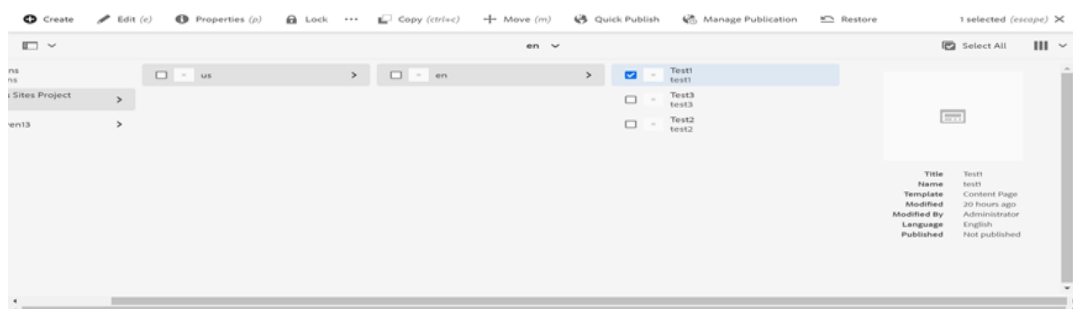

As an author, author should be able to configure a table based on business requirement so that author can create rows and columns and add details to each cell based on business use case.

3 Design

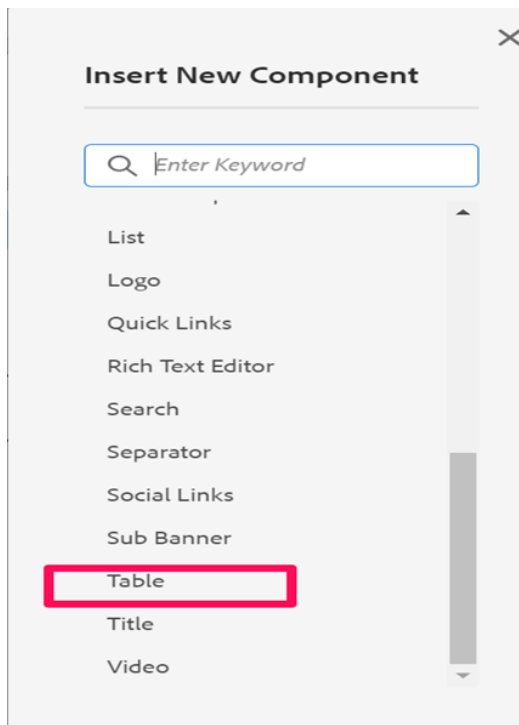

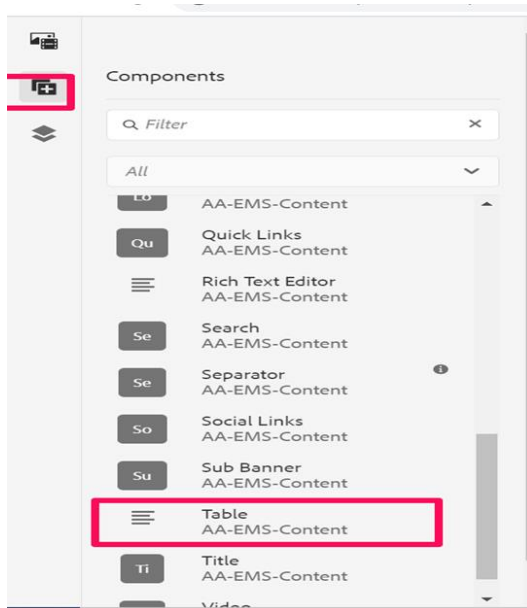

This Table component contains the authoring for Table.

4 Authoring Steps

- **Step 1:** Create a new page or open an existing page by selecting the page and click on Edit option.

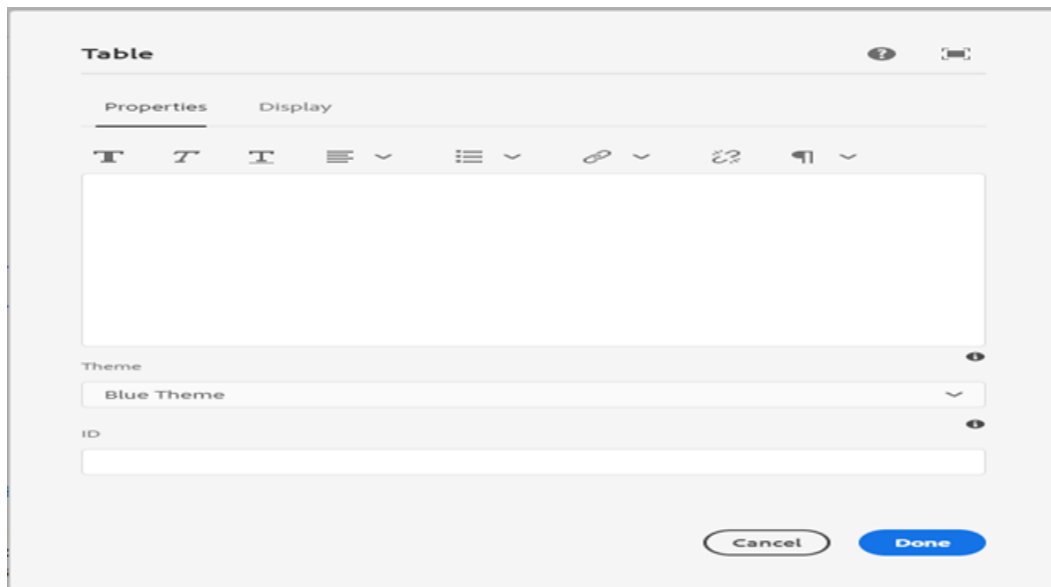

- **Step 2:** Once the Page is opened, go to the content panel from the top left side panel and then click on the component tab and Drag the Table component from the left side panel and drop it inside the Layout Container. Or choose it from the available components list.

- **Step 3:** Select the Table component and click on the wrench icon to open the component dialog.

- **Step 4:** Enter the Table details in Table Dialog as per below snap.

- **Step 5:** Fill in all the required details in the component dialog as following table.

S. No	Field Title	Field Type	Field Description	Mandatory (Yes/No)
1.	Text	Rich text	Enter the text.	No
2.	Theme	Dropdown		No
3	Component background color options	Dropdown	Select White or Grey for the component background	No

- **Step 6:** Click “Done” once you have entered all these details.
- **Step 7:** The Table will now be visible on the Page and can be previewed.

5 User Interface
