1.1 Component: Checkout

1 Overview

The Checkout component allows web authors to display different headings, redirect URL and button text on Checkout page.

2 Business Use Case

It is a way to define the UI of Checkout page by authoring different properties.

3 Design

This Checkout component has properties where author can define the headings, button text and redirect URL for Buy Now button displayed on Checkout page.

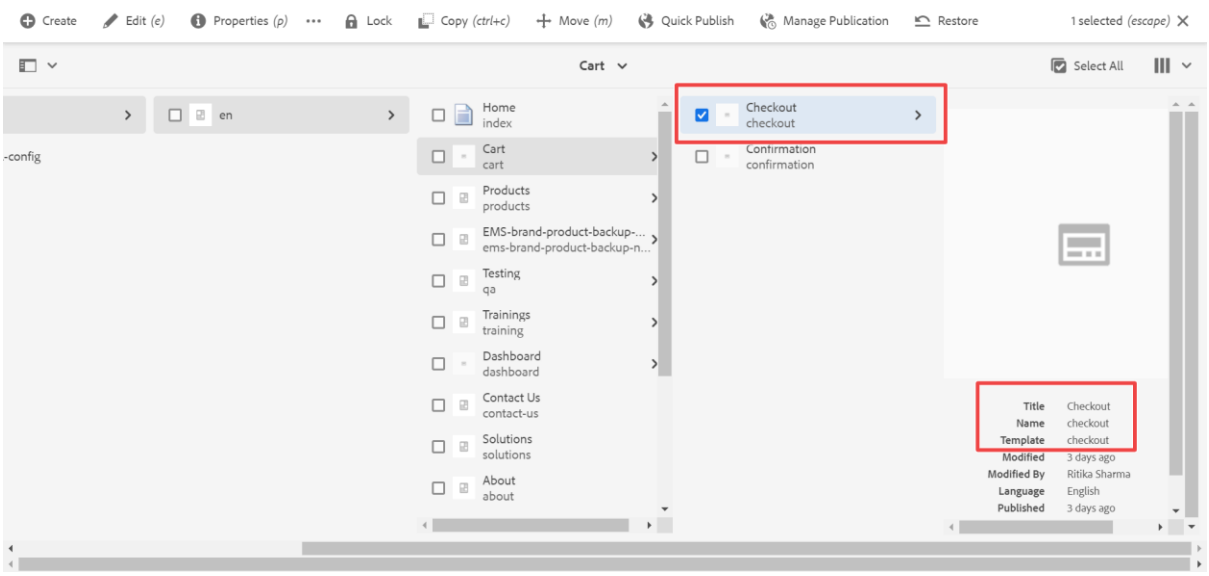
Below are the properties which are part of Checkout Component.

- Default Address Heading
- Default Address Sub Heading
- Other Address Heading
- Other Address Sub Heading
- Request To Quote Button Text
- Buy Now URL

4 Authoring Steps

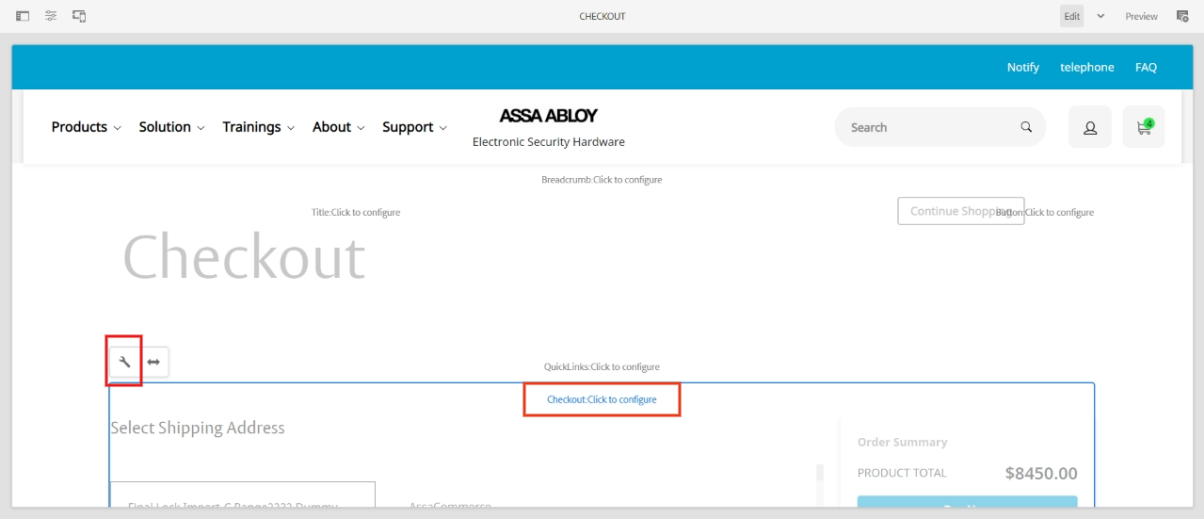
➢ Step 1: Create a new page with Checkout template or open an existing page by selecting the page and click on Edit option.

> **Note:** For page creation, please follow steps mentioned in References>Create Page



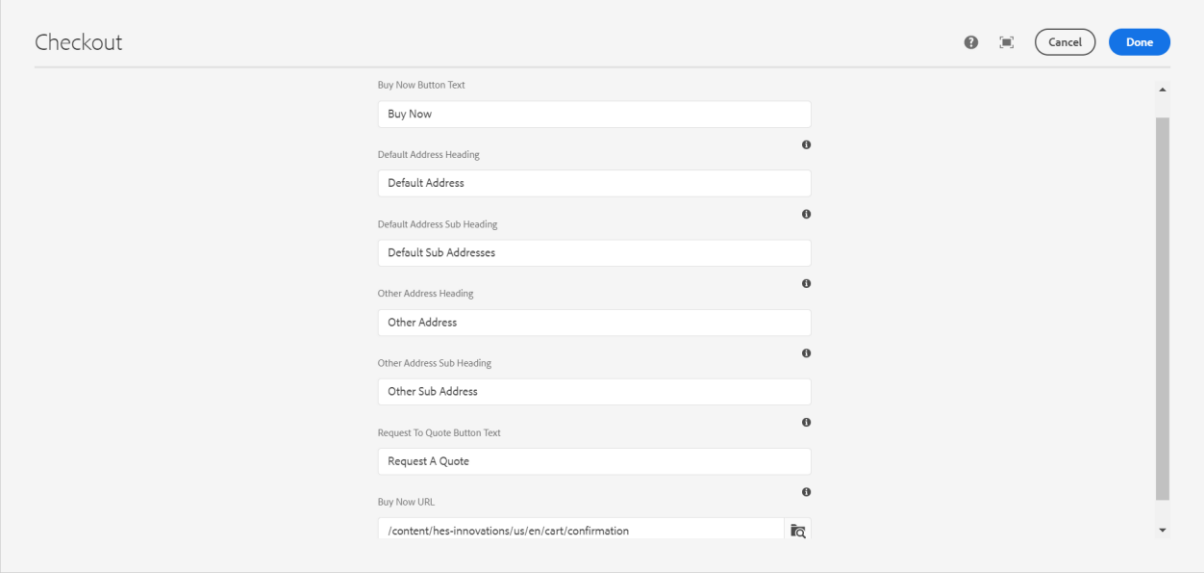
> **Note:** Here Language for the created page is English, multiple languages are supported and author can create the page in desired language. The language in which the page is created will be displayed here.

- Step 2: Once the Page is opened, by default Checkout component is there as part of checkout template. If author has selected any other template, then choose it from the available component list.



- Step 3: Click on 'Checkout: Click to configure' and then click on the wrench icon to open the component dialog.

- Step 4: Now author the properties in the Checkout Dialog as per below example:



Note: For any help regarding the mentioned property, author can click on help icon displayed against each property.

- Step 5: Fill in all the required details in the component dialog as following table:

S. No	Field Title	Field Type	Field Description	Mandatory (Yes/No)
1	Buy Now Button Text	Text Field	Enter the "Buy Now" button text	No
2	Default Address Heading	Text Field	Enter Default Address Heading	No
3	Default Address Sub Heading	Text Field	Enter Default Address Sub Heading	No
4	Other Address Heading	Text Field	Enter Other Address Heading	No
5	Other Address Sub Heading	Text Field	Enter Other Address Sub Heading	No
6	Request To Quote Button Text	Text Field	Enter Request To Quote button text	No
7	Buy Now URL	Path Field	Enter Buy Now URL	No

- Step 6: Click “Done” once author has entered the details.

- Step 7: The buttons and headings will now be visible on the Page with text configured and can be previewed.

Note: If any field is left blank then the nothing will be displayed on the page otherwise authored text will be displayed.
